PROG1400 – Midterm Practical

Student Self-Evaluation

Course: PROG1400 – Introduction to Object-Oriented Programming **Instructor:** Davis Boudreau

Student Name: _____

Student ID: _____

GitHub Repository: _____

Self-Evaluation Scale

Score	Meaning
5	Exceeded expectations
4	Meets expectations
3	Approaching expectations
2	Significant gaps
1	Limited understanding
0	Not attempted

Task 1 — Repository Setup & Version Control (LO3)

Goal: Demonstrate the ability to manage and distribute code using GitHub.

Checklist:

- Created repository **wXXXXXXXX-midterm**
- Cloned repository locally
- Used proper project structure
- Made **multiple meaningful commits**
- Commit messages describe the work performed

Self-Evaluation Score

Score (/5): _____

Reflection

What did you do well with GitHub and version control?

What could you improve about your Git workflow?

Task 2 — UML Modelling with Mermaid (LO4)

Goal: Develop software modelling documentation for your game.

Checklist:

- Identified **3–5 game objects**
- Created **UML Class Diagram**
- Created **UML Sequence Diagram**
- Diagrams reflect **initialization state**
- Diagrams match the intended game design

Self-Evaluation Score

Score (/5): _____

Reflection

How accurately do your diagrams represent your game design?

What would you improve about your UML diagrams?

Task 3 — Applying OOP Principles in Code (LO2)

Goal: Implement object-oriented design principles in your game.

Checklist:

- Created Python classes based on UML
- Demonstrated **encapsulation**
- Demonstrated **inheritance**
- Demonstrated **polymorphism**
- Tested code by **instantiating objects**

Self-Evaluation Score

Score (/5): _____

Reflection

Which OOP concept do you feel you applied the best?

Which OOP concept do you need to practice more?

Development Workflow Reflection

During the midterm the recommended workflow was:

```
Repository → UML Design → Python Code → Testing → Commit
```

Did you follow this workflow?

☐ Yes ☐ Mostly ☐ No

Explain briefly:

Overall Self-Evaluation

Task	Score
Task 1 – GitHub Workflow	/5
Task 2 – UML Modelling	/5
Task 3 – OOP Implementation	/5

Total Self-Evaluation Score

/15

Final Reflection

What is **one thing you learned from this midterm?**

What is **one thing you want to improve before the final project?**

Student Signature: _____

Date: _____
